

GIST Project

Prof Herrmann is lecturer at the German Institute of Science and Technology, a foundation of the TUM-Tech GmbH. This institute offers master courses on modern fields of science and technics under the academic responsibility of the Technical University of Munich and the National University of Singapore. The course "Industrial Chemistry" started in July 2002. It takes three semester and allows a scientific education in coordination with industrial needs in Singapore and Munich. Therefore scholarships of the chemical industry are available.

Prof Herrmann and Prof Fritz E. Kuehn instruct the compulsory lecture "Catalysis" together with colleagues of the NUS.
